Forecast for Monday 19 Jul 2021

Weather: A dry and sunny day, once early valley mist or fog lifts around dawn, with temperatures rising quickly and feeling hot by the afternoon, especially on south facing slopes. Some cumulus cloud bubbling up by the afternoon but staying well above all the summits. A small chance of an isolated afternoon or evening shower developing. Otherwise, staying dry and clear into the evening and overnight.

Chance of cloud free mountain/hill tops above 600m: 100% throughout

Visibility: Locally poor in any valley mist around dawn. Otherwise very good with distant hills and landmarks easily visible. A slight heat haze during the afternoon, with this reducing the air clarity a little.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Very high UV levels will give a high risk of sunburn and the hot conditions will give a risk of dehydration and heat exhaustion. Remember sun protection and plenty of water if you are heading into the mountains.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Tuesday 20 Jul 2021

Weather: Dry and sunny during the morning and quickly becoming very warm or hot once again. Small amounts of cloud bubbling up during the afternoon and once again a small chance of a rogue shower developing with a risk of thunder, but most likely remaining dry.

Maximum wind: Variable or northwesterly 5-10 mph.

Chance of cloud free mountain/hill tops above 600m: 100%

Visibility: Locally poor in any valley mist first thing. Otherwise very good with distant hills and landmarks easily visible. A slight heat haze during the afternoon, with this reducing the air clarity a little.

Temperature: **Valleys:** Plus 15 Celsius rising to plus 31 Celsius.
At 600m: Plus 18 Celsius rising to plus 25 Celsius.
Freezing level: Well above the summits.
